Inlay Hints > Parameter Names: Enabled

Enable/disable inlay hints for parameter names:

```
Integer.valueOf(/* s: */ '123', /* radix: */ 10)
```

Java > Inlay Hints > Parameter Names: Exclusions can be used to disable the inlay hints for methods.

none

Inlay Hints > Parameter Names: Exclusions

The patterns for the methods that will be disabled to show the inlay hints. Supported pattern examples:

- `java.lang.Math.*` - All the methods from `java.lang.Math`.
- `*.Arrays.asList` - Methods named as 'asList' in the types named as 'Arrays'.
- `*.println(*)` - Methods named as 'println'.
- `(from, to)` - Methods with two parameters named as 'from' and 'to'.
- `(arg*)` - Methods with one parameter whose name starts with 'arg'.
